## JEWELRY DESIGNS

### BRACELET SIZE GUIDE

1. Print this page and cut out the ruler.
2. Wrap it around your wrist and hold it at the size that would represent how loose or tight you would like it to fit. Add a 1/2 inch to this measurement. This is your size. For Example, If you like a snug fit, measure the actual circumference of your wrist and add 1/2 inch.

**If you like a loose fit we strongly recommend getting the lobster clasp to ensure that your bracelet does not fall off!!**
